<b>Description:</b>	A street light, light pole, lamppost, street lamp, light standard, or lamp standard is a raised source of light on the edge of a road or path. Streetlights are lamps that provide lighting for roads and refer to lamps that are part of the road lighting range in traffic lighting. Streetlights are frequently employed in a variety of settings where illumination is required. Lamps, wires, light sources, light poles, light arms, flanges, and integrated pieces make up this system.
